

Assignments 2

Learning Basic Charts in Tableau

Task:

- 1) Create a column chart with the qualified candidate by recruiter wise.
- 2) Source-wise candidates count in the bar chart.
- 3) Create a stacked column chart with source and recruiter-wise candidate count.
- 4) Create a pie chart status-wise, showing select, reject, hold & not join counts.
- 5) Create a line chart for year-wise how many candidates were selected.
- 6) Create a map chart for country-wise total select candidates.
- 7) Create a table for state-wise select, reject, hold & not join the count.

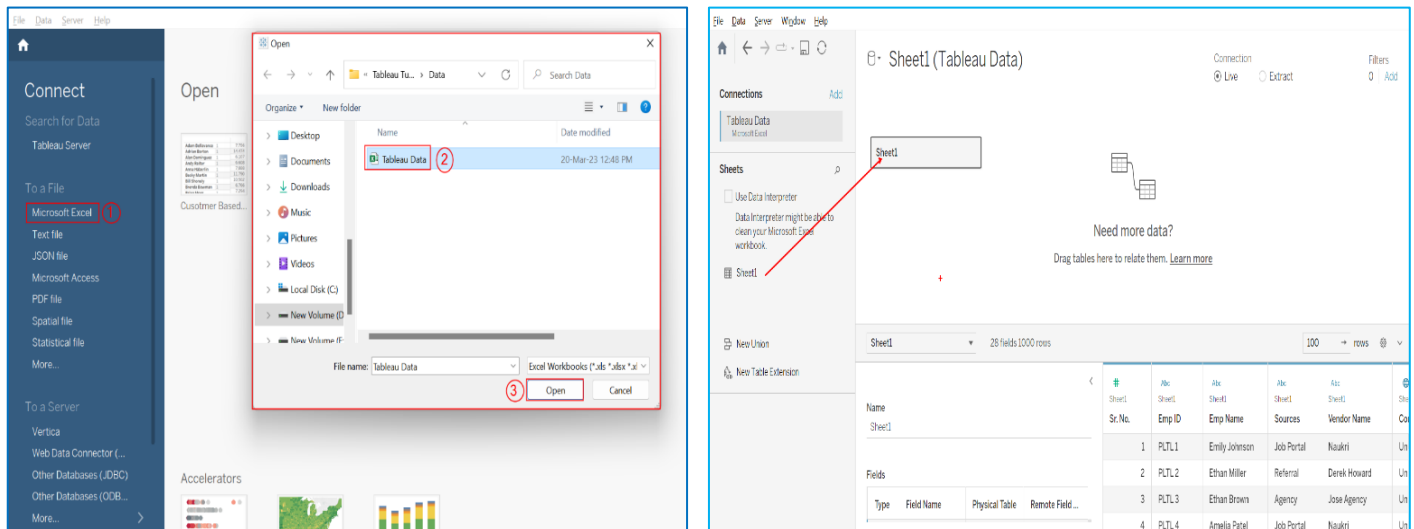

Open Tableau

Step 1: Click on Microsoft Excel then browse the data.

Step 2: Select Excel Data

Step 3: Select the Open button.

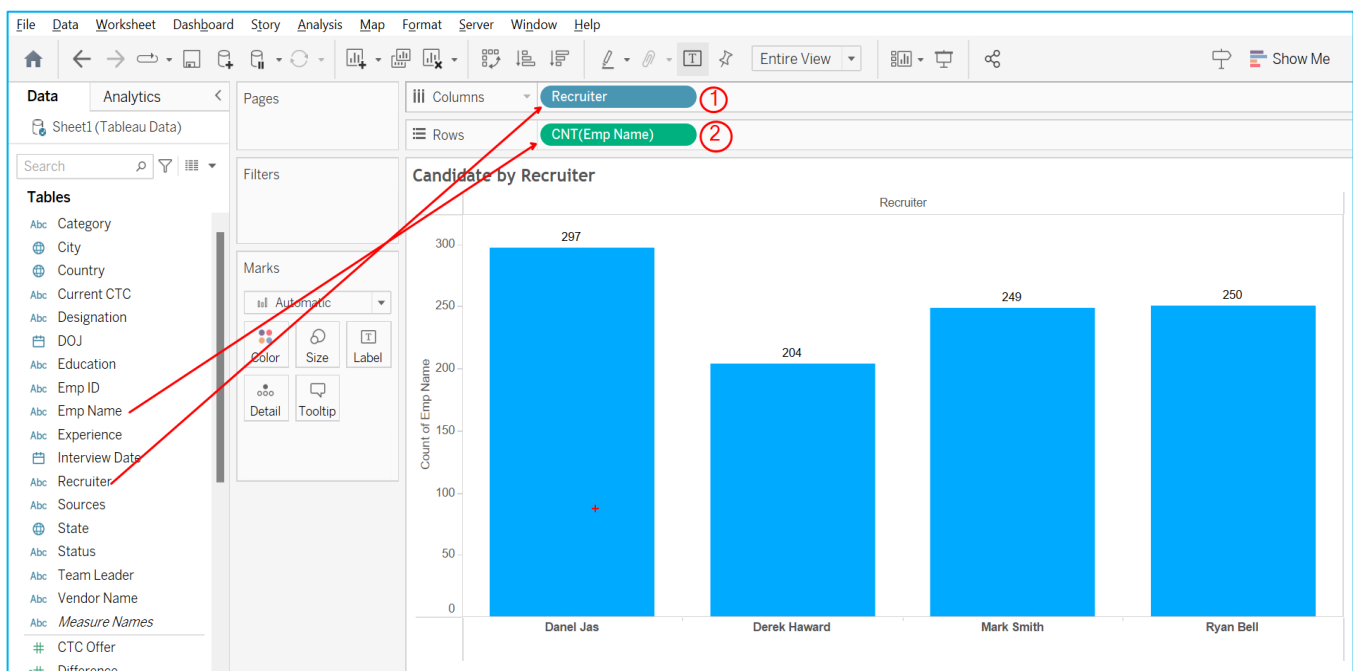

Step 1: See the data source showing on both sides otherwise drag and drop here.

Step 2: Click on "Sheet1"

Create a column chart with the qualified candidate by recruiter wise.

Step 1: Recruiter field in Columns

Step 2: Emp Name into Rows

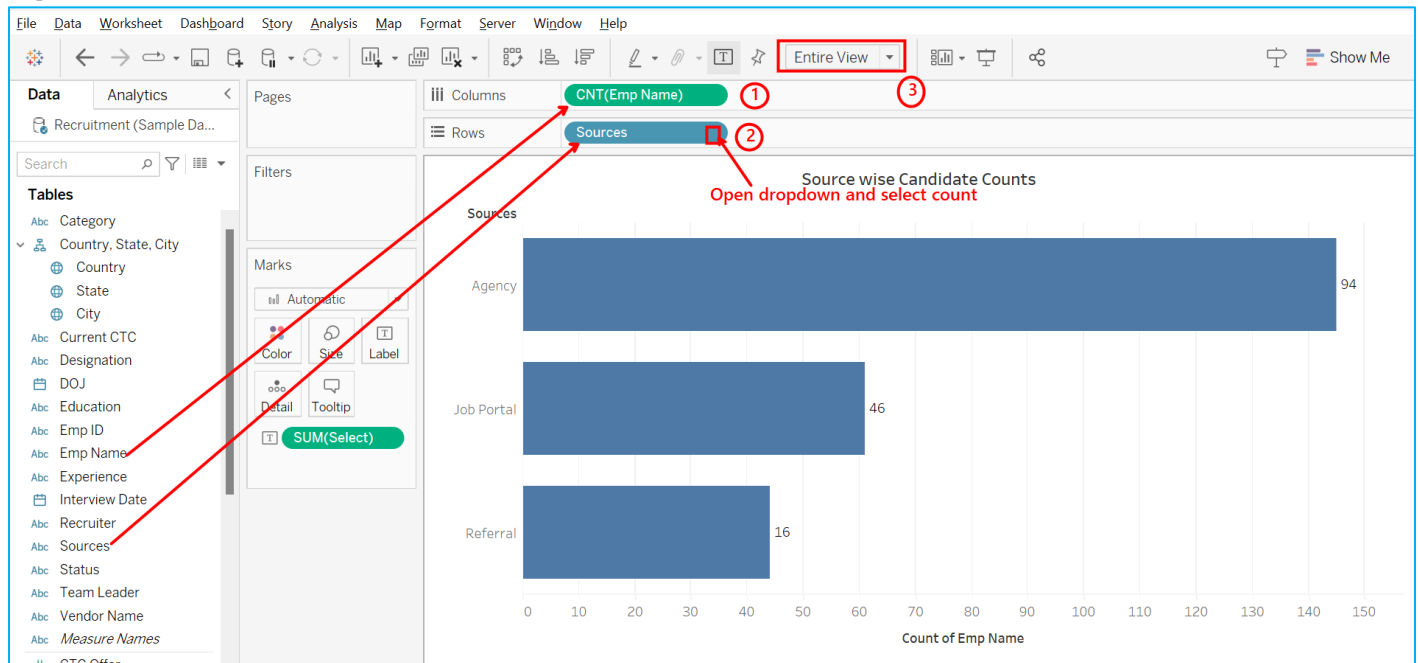

Source-wise candidates count in the bar chart.

Step 1: Emp Name in the Columns area

Step 2: Source in Rows area and open dropdown and Measures then select Count

Step 3: Select Entire View

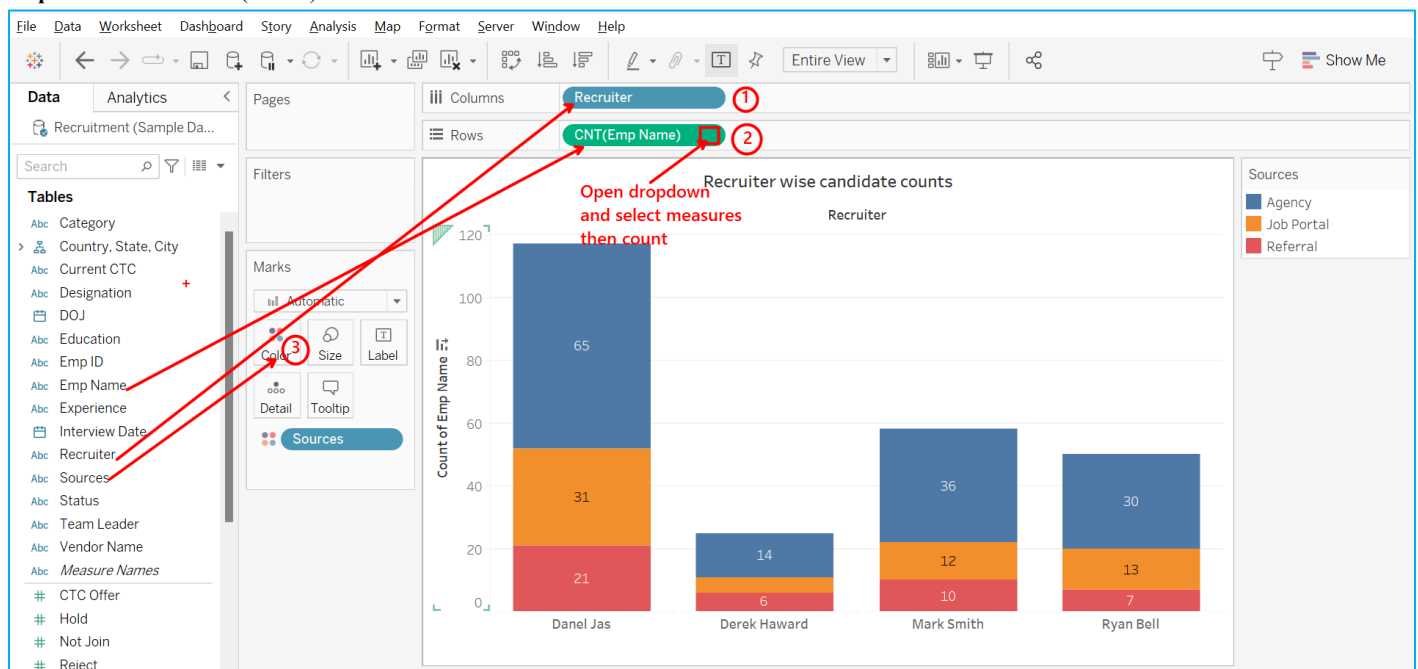

Create a stacked column chart with source and recruiter-wise candidate count.

Step 1: Recruiter in Column

Step 2: Emp Name in Rows open dropdown and select measures then count

Step 3: Source in Color (Marks)

Create a pie chart status-wise, showing select, reject, hold & not join counts.

Step 1: Status field drag into Color (Marks)
