

Assignments 6

Dual Axis Visuals

Task:

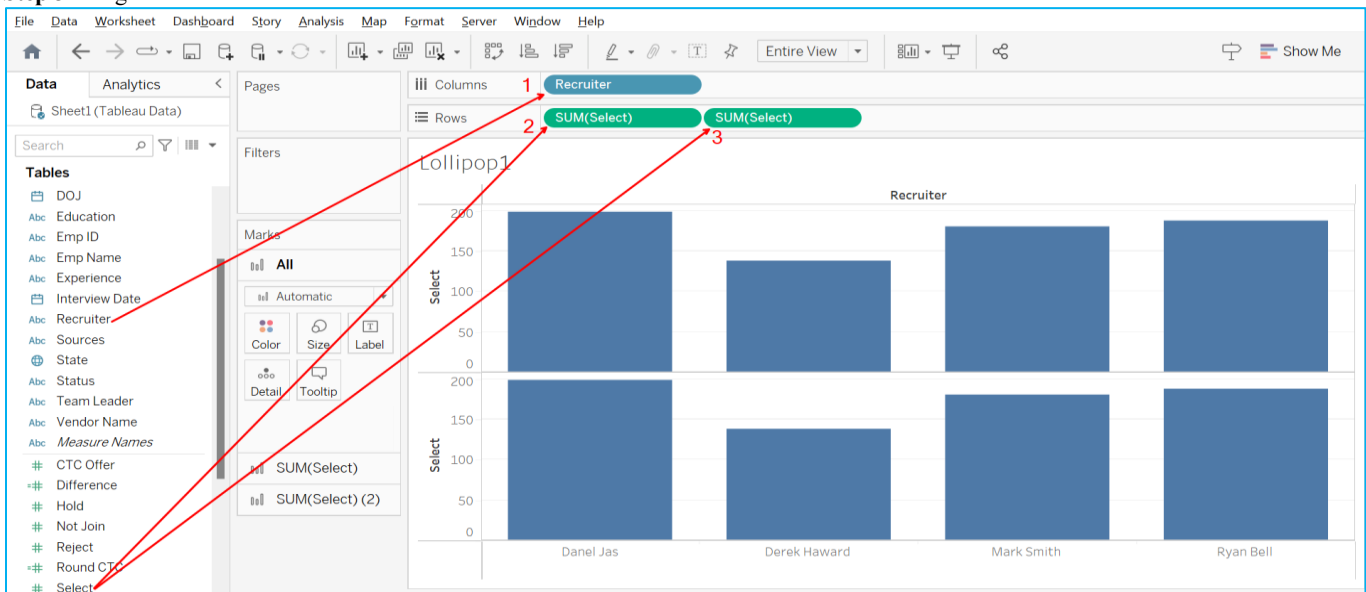

- 1) Create a Lollipop chart on recruiter-wise selected candidates.
- 2) Create a dual-axis chart on vendor-wise select and reject candidates.
- 3) Create a column vs line chart.
- 4) Create a column vs shape
- 5) Create a bar in the bar chart.

Create a lollipop chart for recruiter-wise selected candidates.

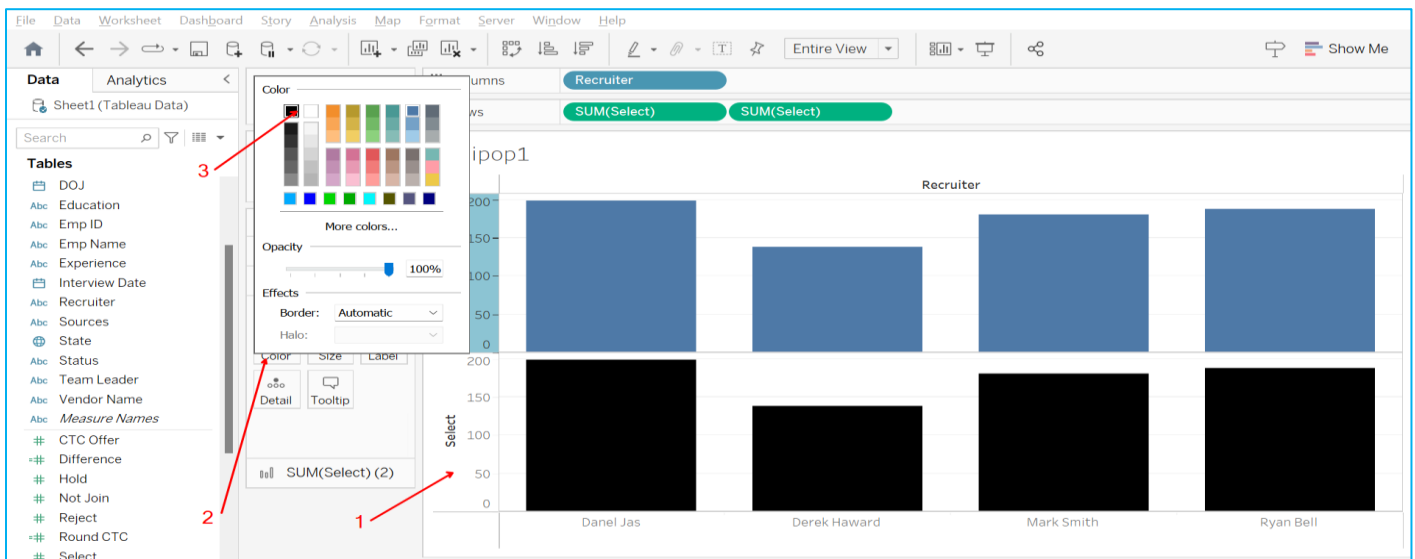

Step 1: Drag the recruiter field in the columns area.

Step 2: Drag Select Field in the rows area.

Step 3: Drag Select Field in the rows area.

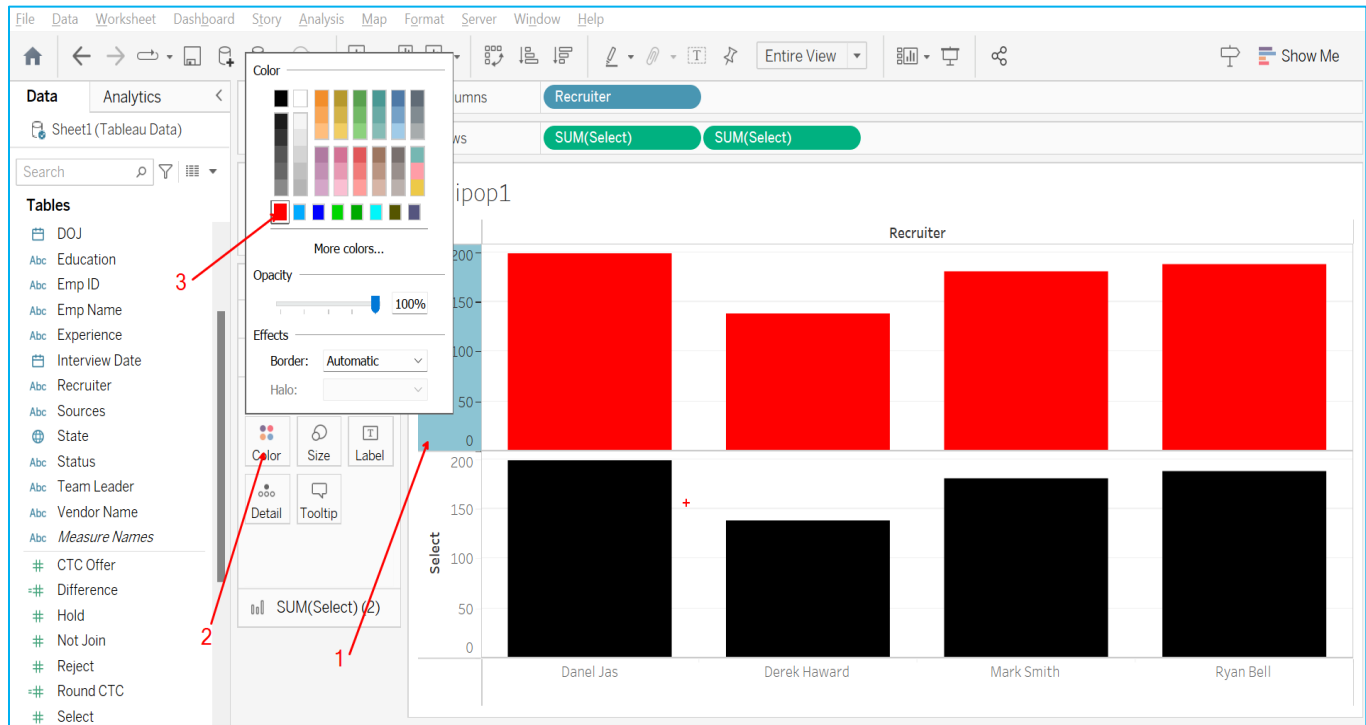

Change the color of the columns. Step 1: Click on Y-Axis. Step 2: Click on Color (Marks Cards). Step 3: Select the "Black" color.

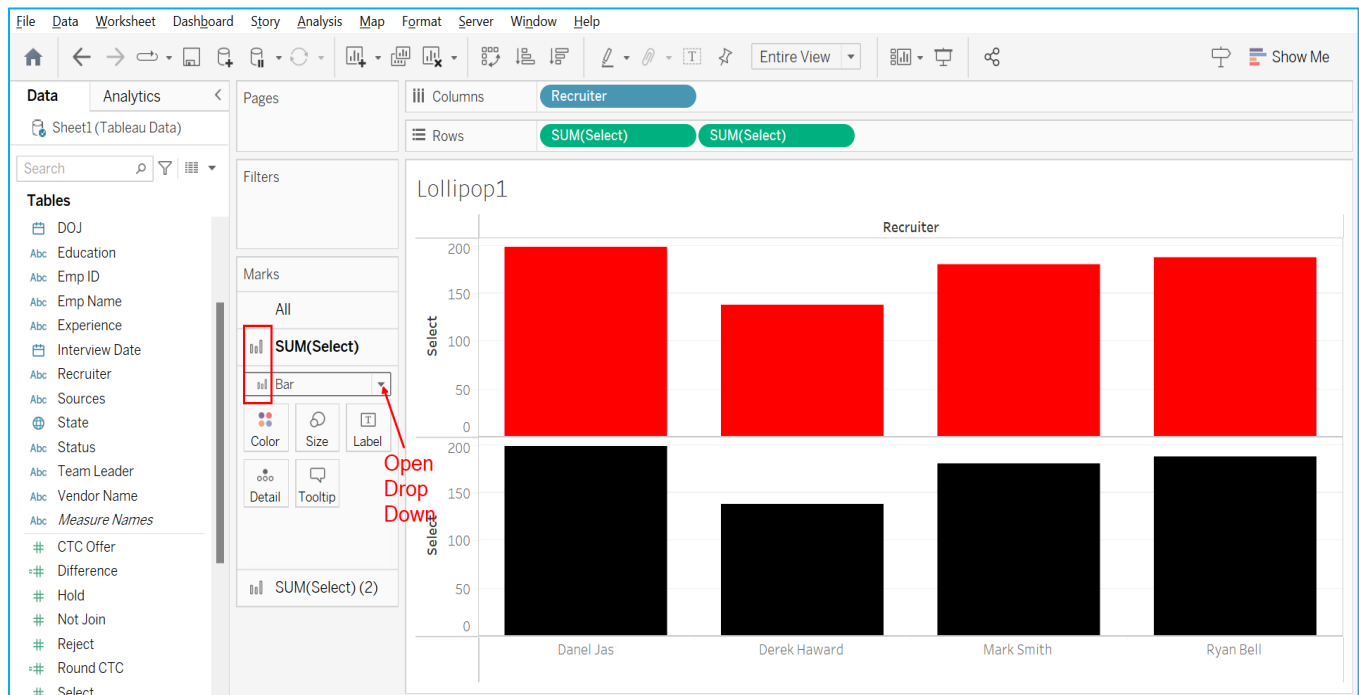

Same for the above column

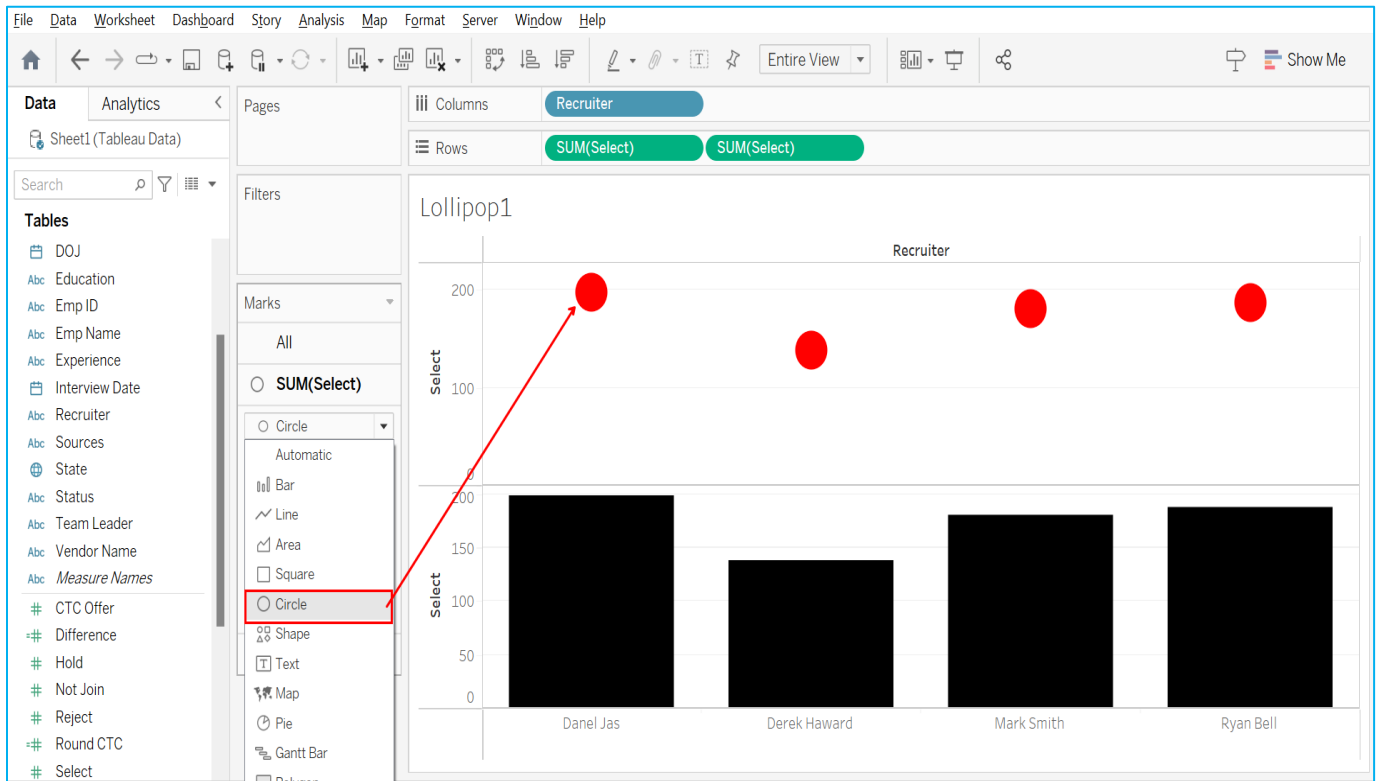

Change the color of the columns. Step 1: Click on Y-Axis. Step 2: Click on Color (Marks Cards). Step 3: Select the “Red” color.

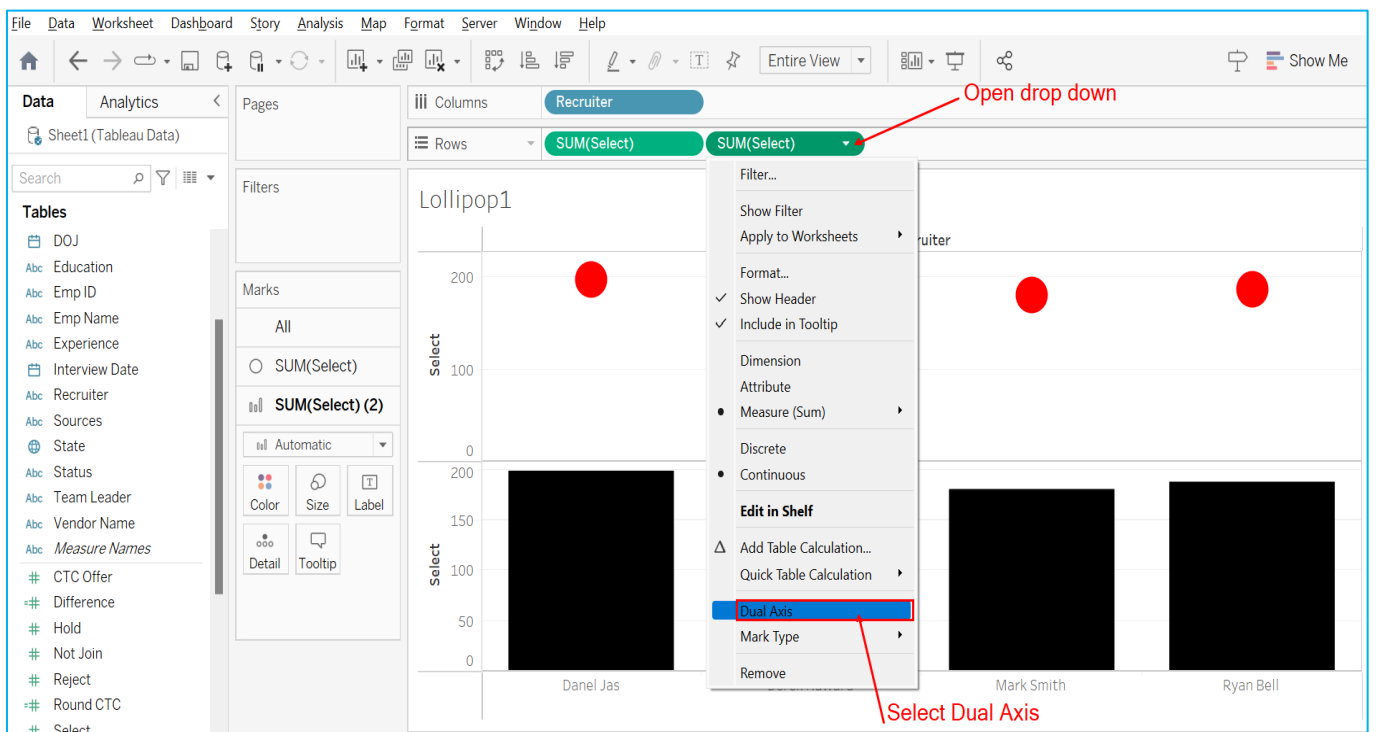

Both charts are column charts so the above column chart changes into a circle chart so open the drop-down and select circle.

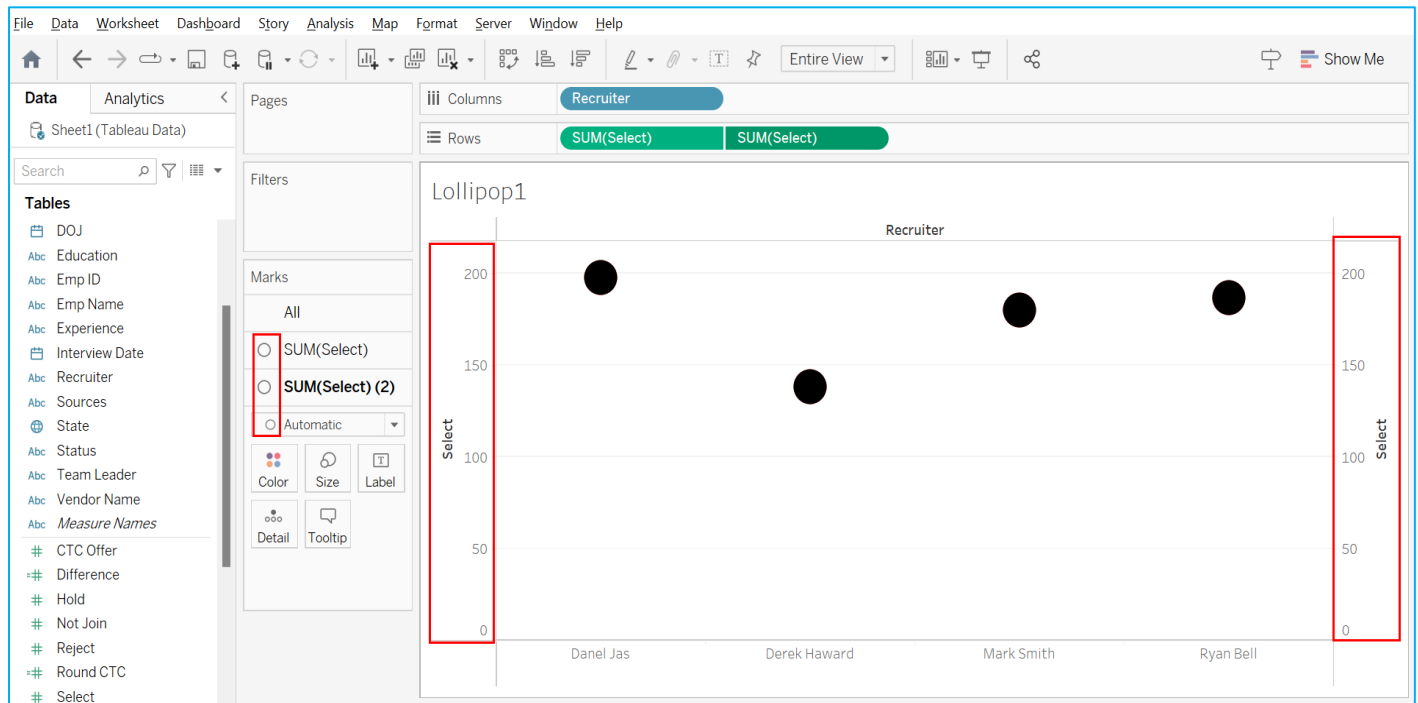

After selecting Circle, the above chart converts into the circle

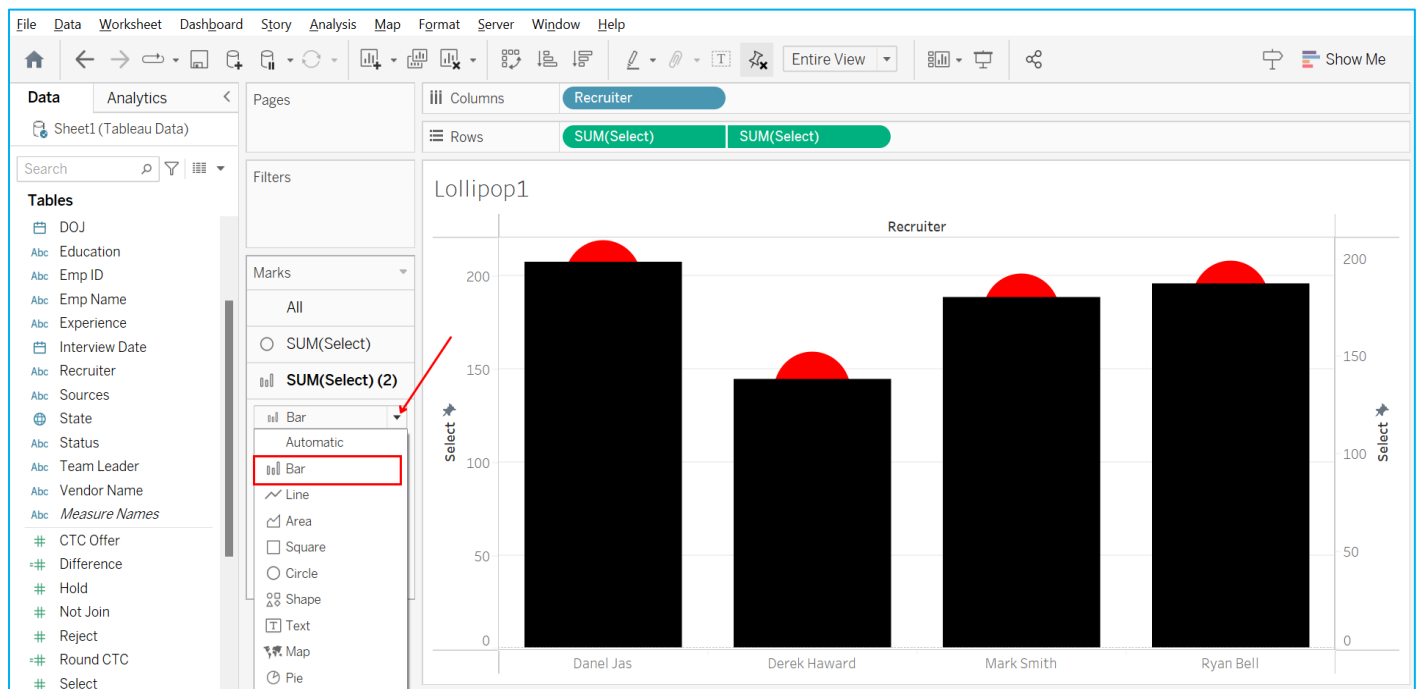

Click on the drop-down and then click on the Dual axis.

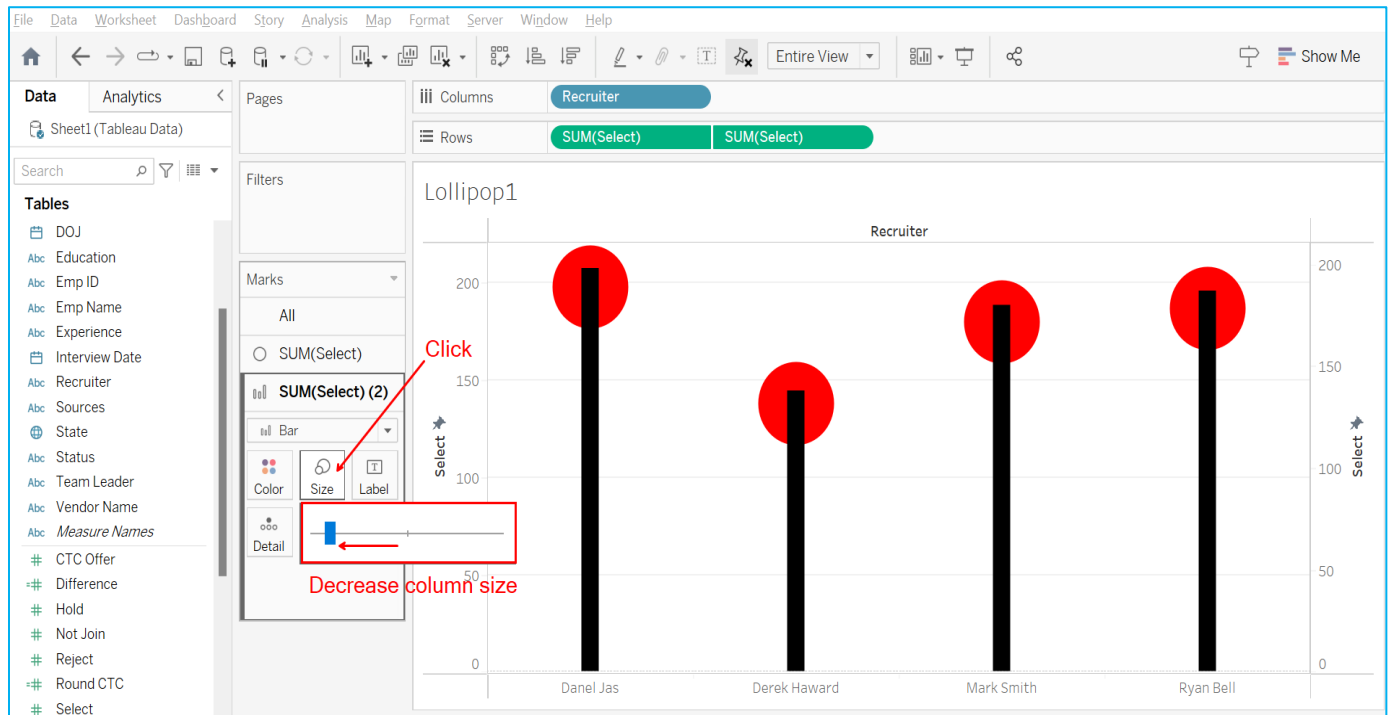

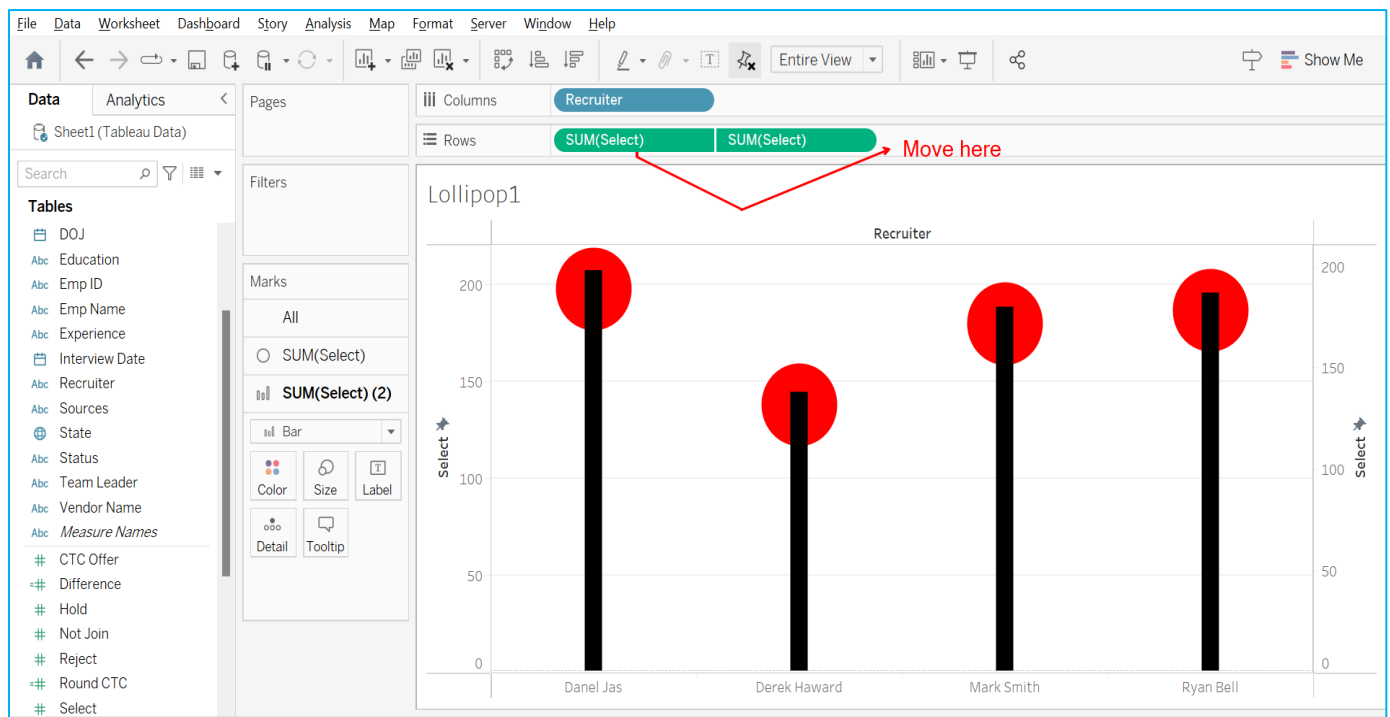

Open the drop-down and select the Bar chart

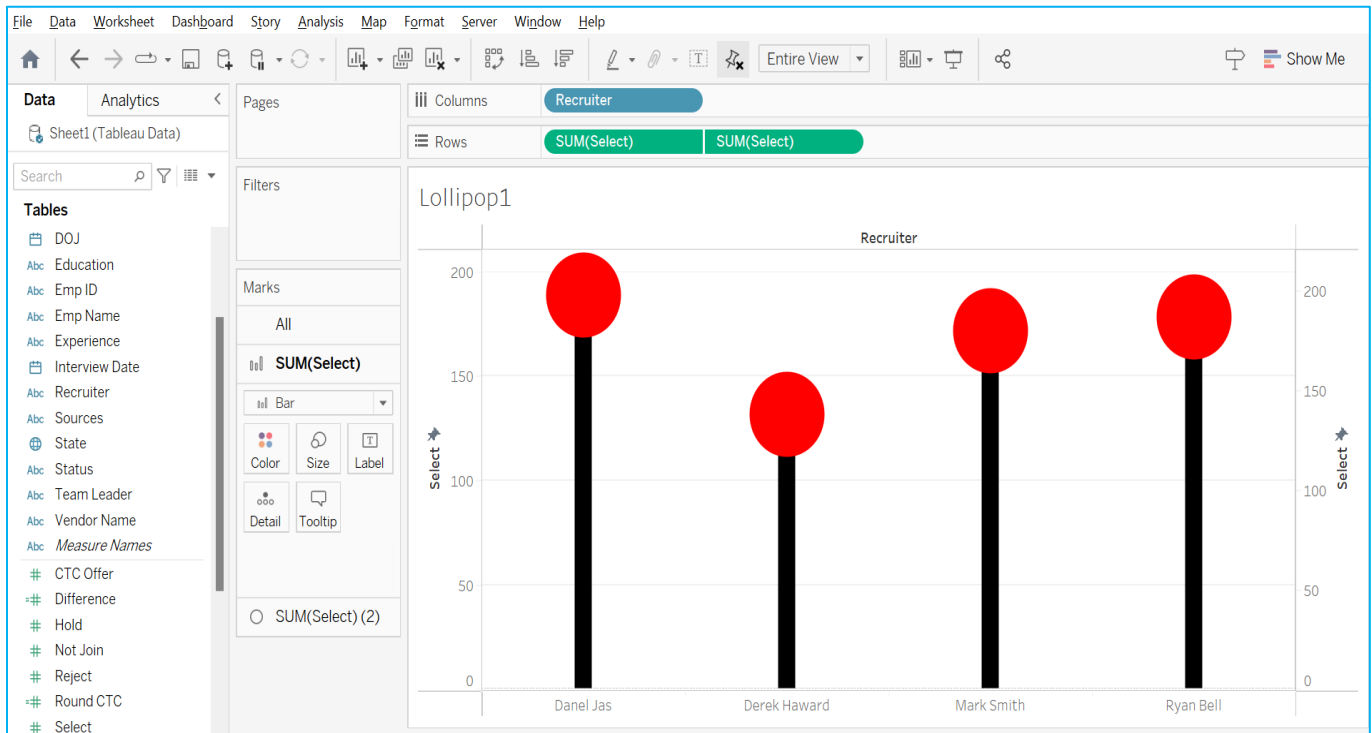

Click on the size option from marks cards and decrease the column width.

Shift (SUM(Select)) field last

Output like this below

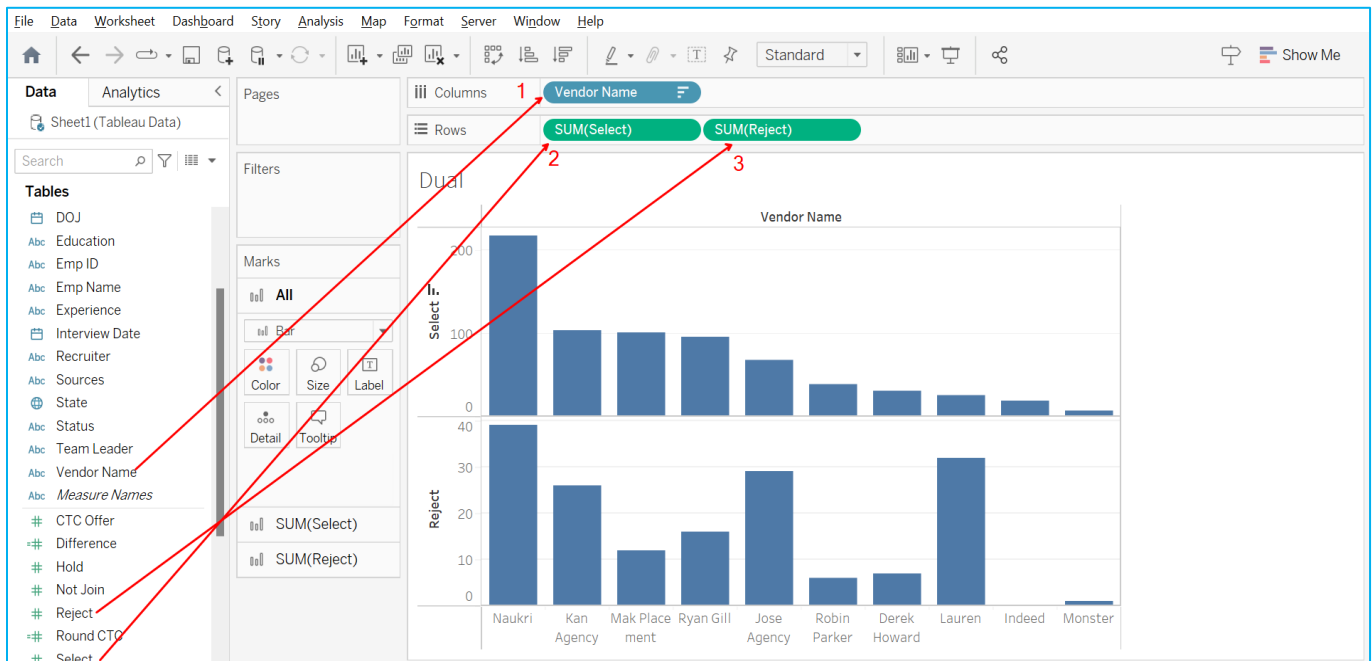

Create a dual-axis chart on vendor-wise select and reject candidates.

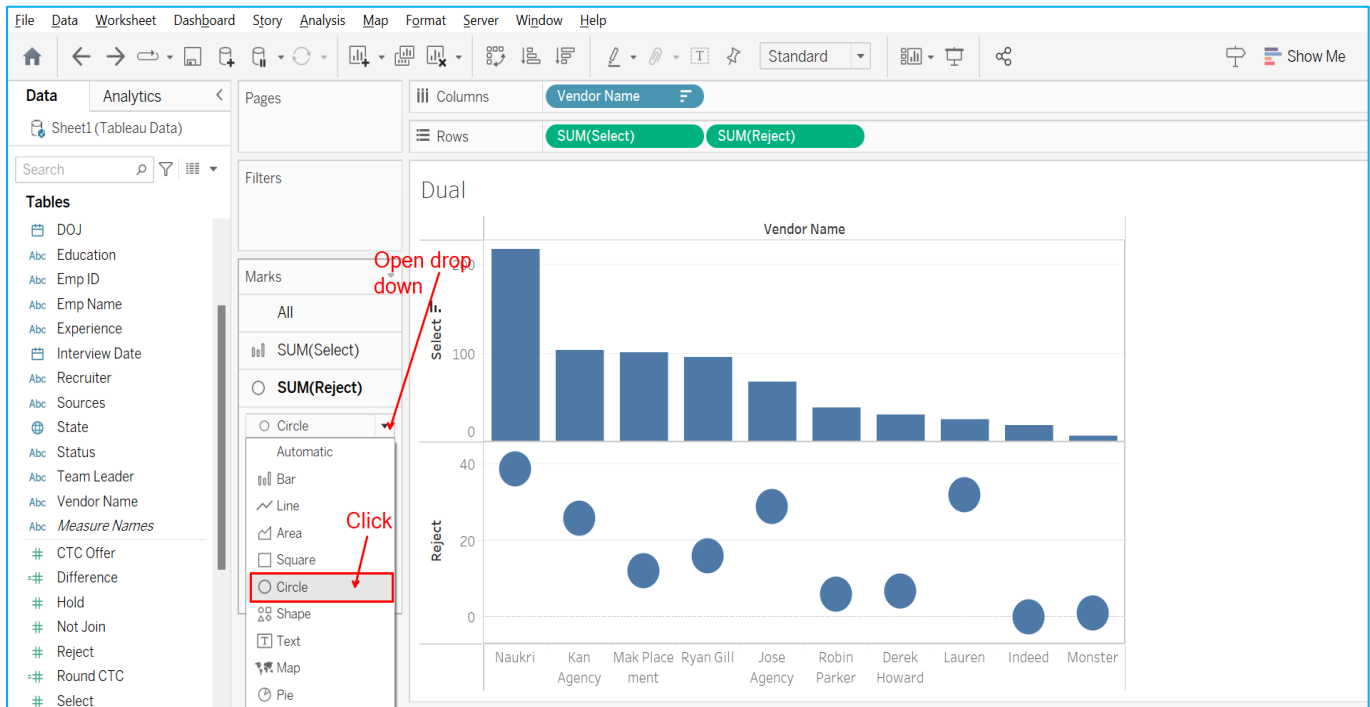

Step 1: Drag the Vendor Name field in the Columns area.

Step 2: Drag Select Field in the rows area.

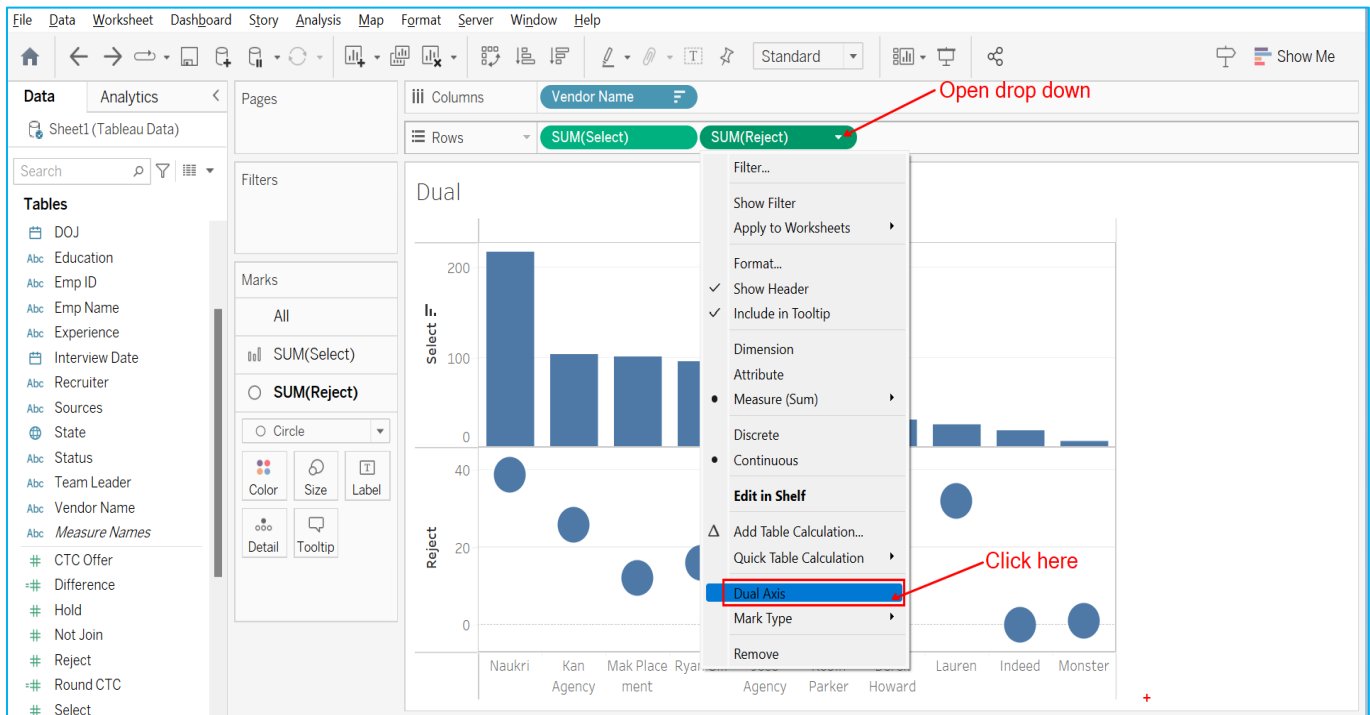

Step 3: Drag the select field in the rows area.

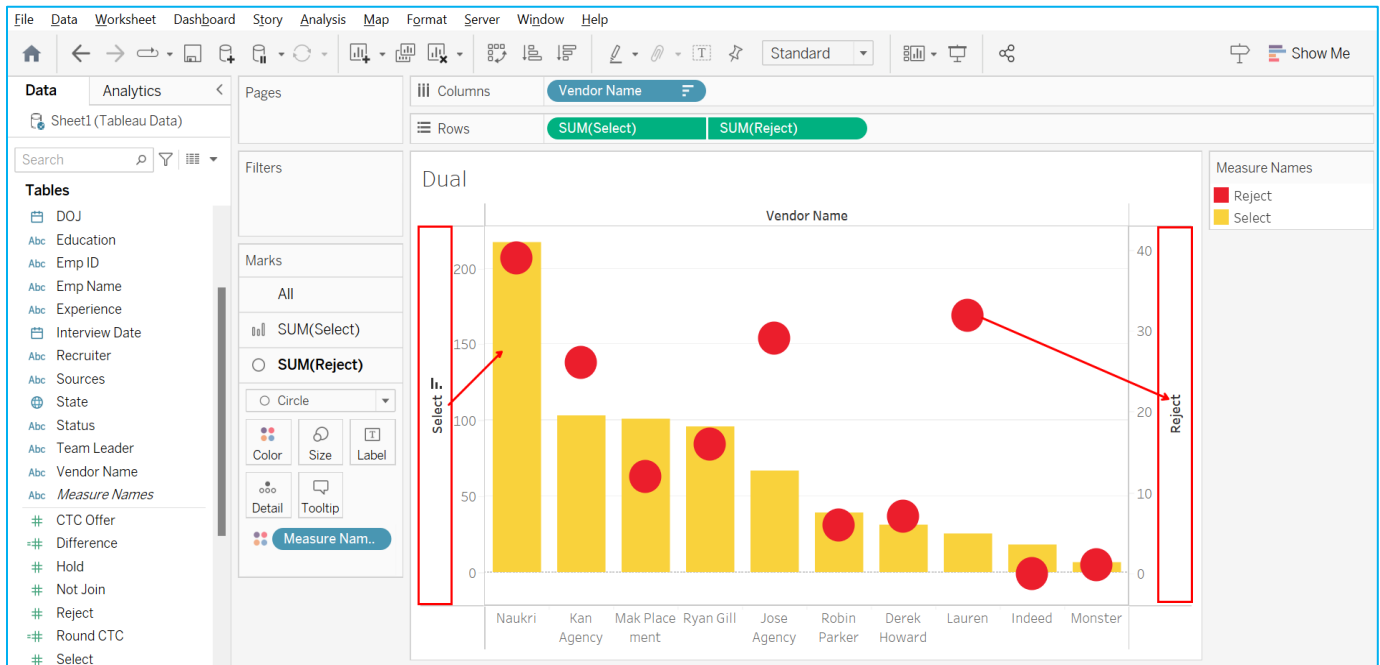

Change the column chart into Circle.

Open (SUM(Reject) drop-down and select the dual axis

The output is below.

Create a column vs Line chart for designation-wise total candidates and select candidates.

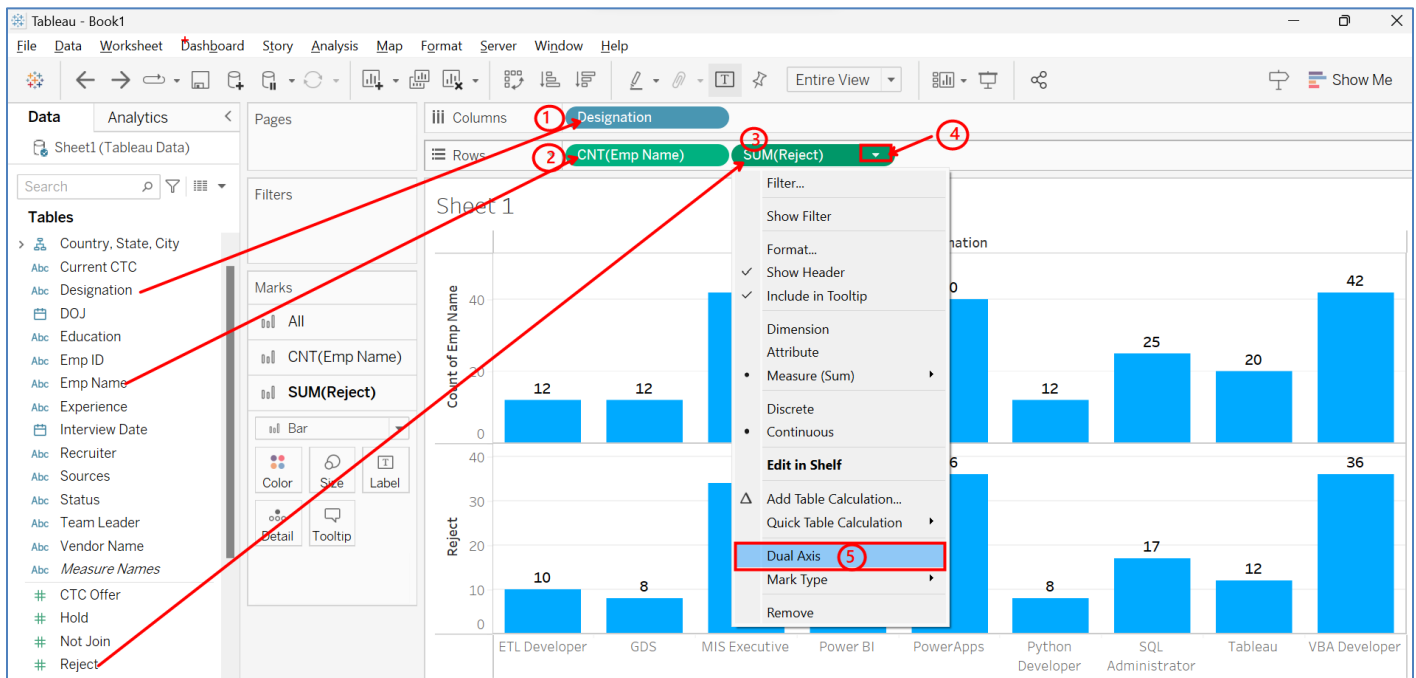

Step 1: Drag the Designation field into the columns area.

Step 2: Drag the Emp Name field into the rows area.

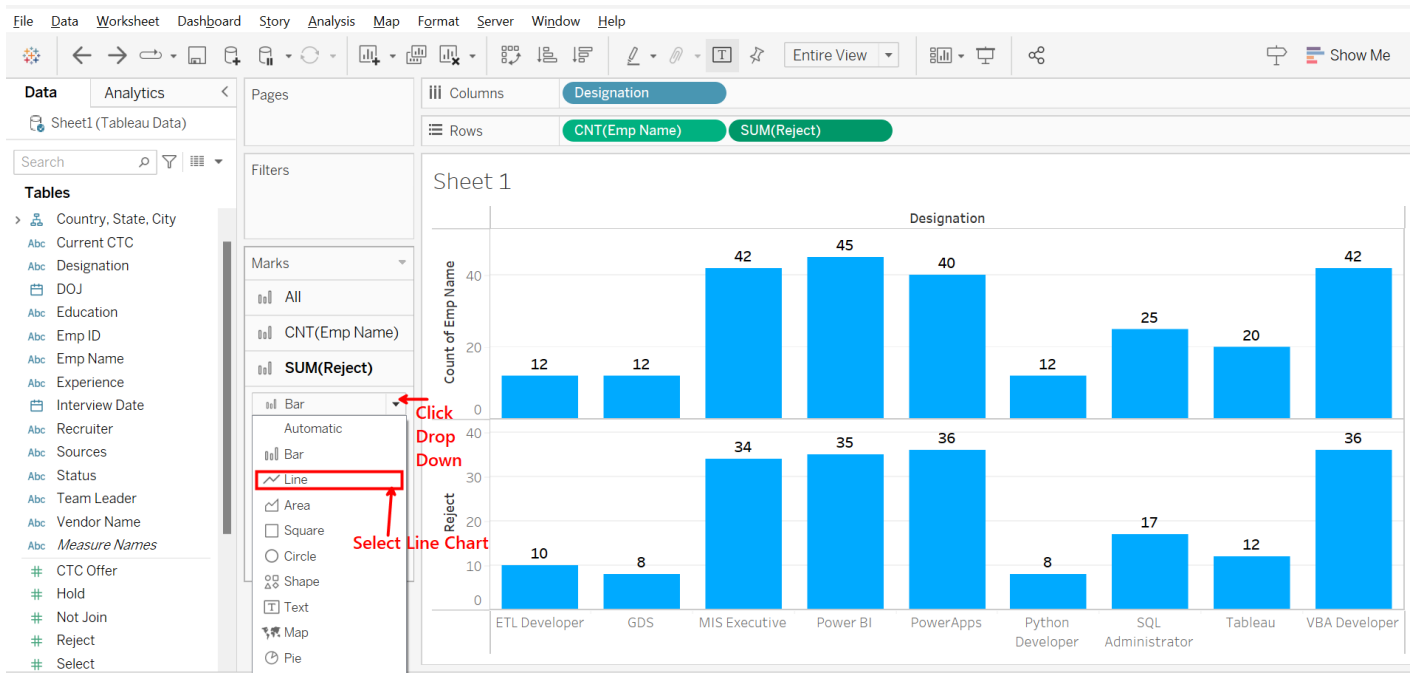

Step 3: Drag the Reject field into the rows area.

Step 4: Open the drop-down of SUM(Reject) fields.

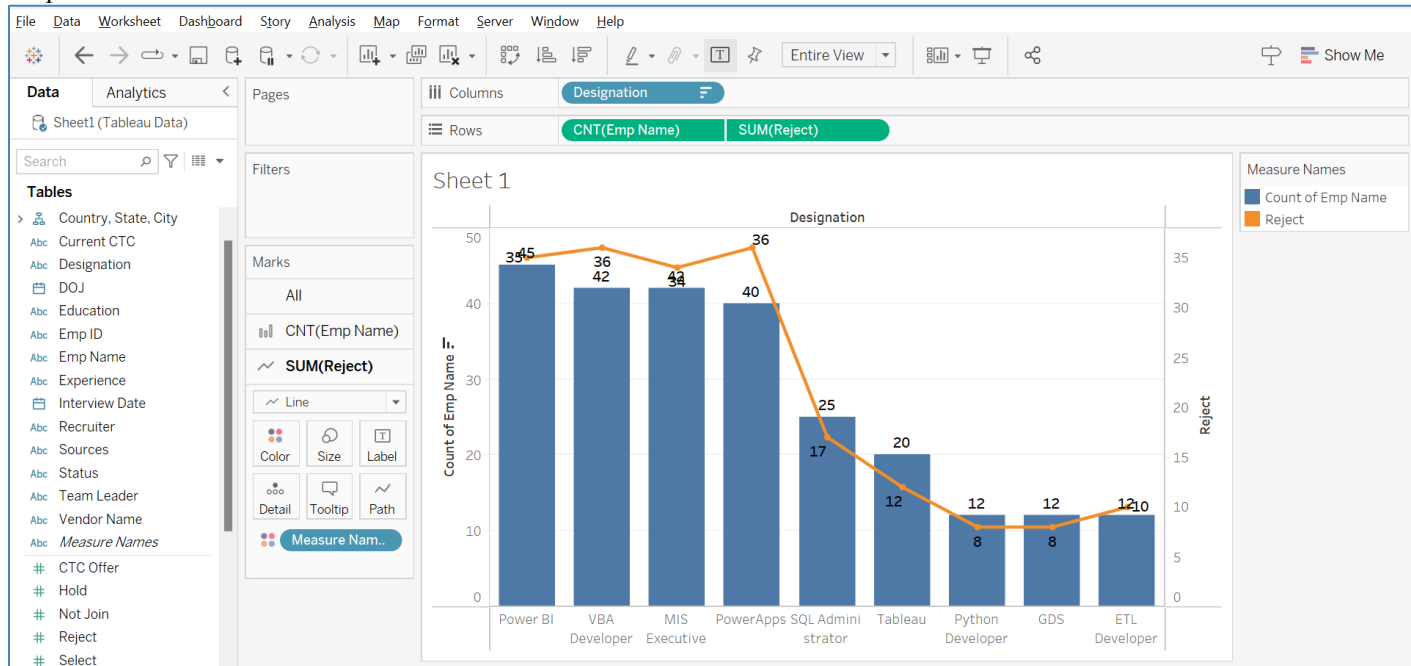

Step 5: Select the Dual Axis option from the dropdown.

Change the column chart into the line chart by selecting line chart from the dropdown

Output

Create designation-wise hold and not join in column and shape.

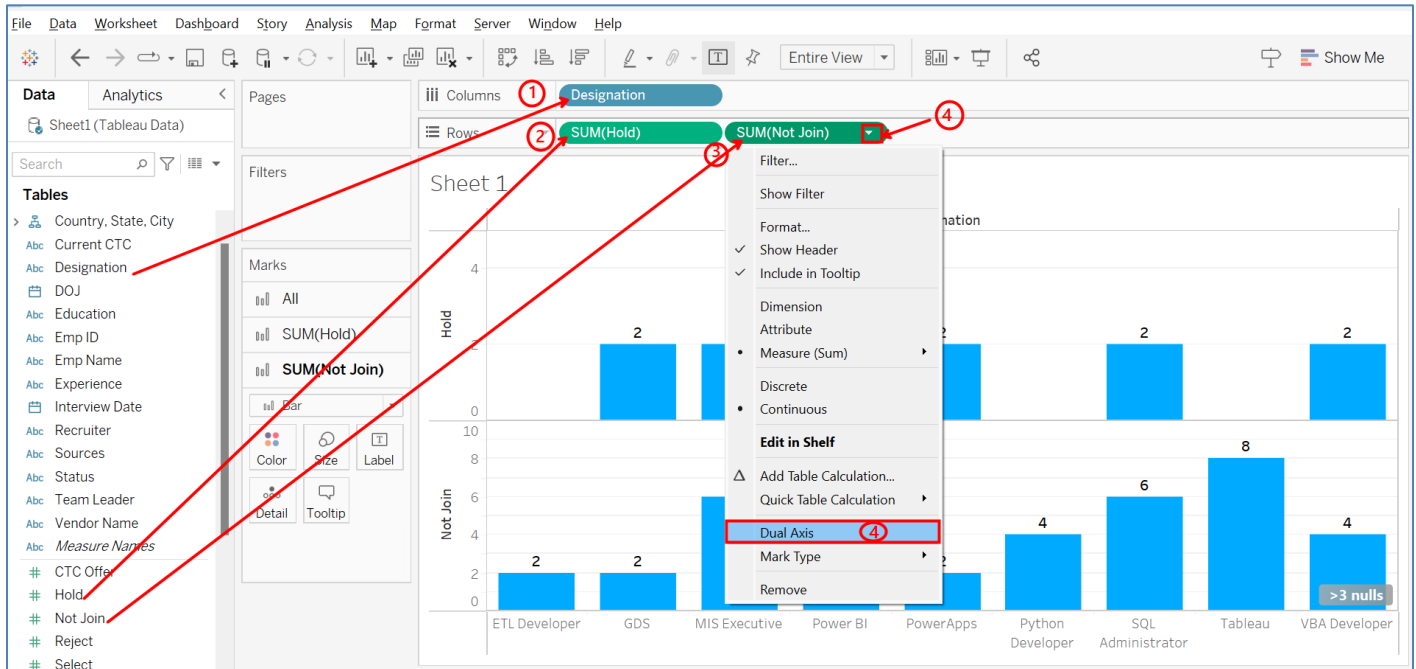

Step 1: Drag the designation field in the columns area.

Step 2: Drag the hold field into the rows area.

Step 3: Drag the not join field into the rows area.

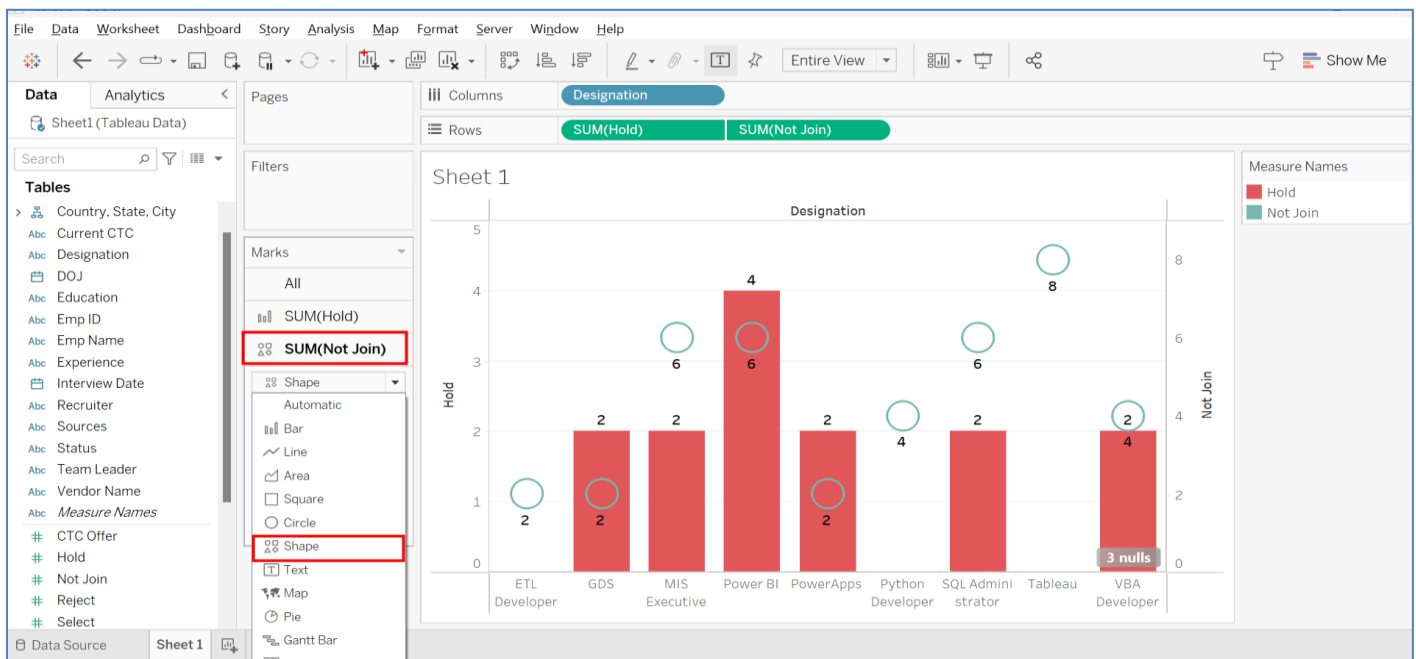

Step 4: Open the dropdown

Step 5: Select the dual-axis option.

Open the drop-down of Field (Sum (Hold)) from Marks & select column chart.

Open the drop-down of Field (Sum (Not Join)) from Marks & select shape.

Create a bar in the bar chart for recruiter-wise total candidates vs select candidates.

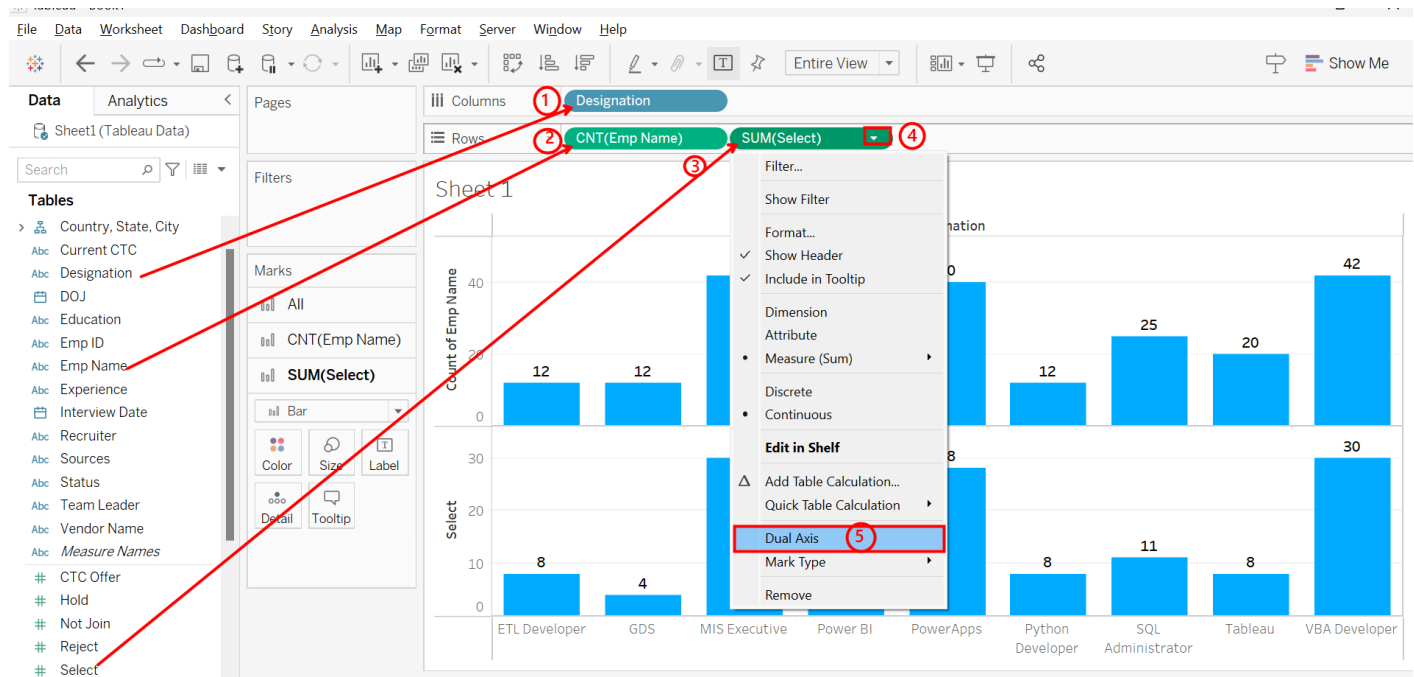

Step 1: Drag the recruiter field into the column area.

Step 2: Drag the Emp Name field into the rows area.

Step 3: Drag the Select field into the rows area.

Step 4: Open the drop-down of the (SUM(Select)) from rows.

Step 5: Click the dual-axis option.

Step 1: Select (SUM(Select)) from the marks card.

Step 2: Click on Size from the marks card.

Step 3: Decrease the column size.
