

Final Project of Tableau

Welcome to the Final Project wherein we will be building a comprehensive dashboard [Dynamic report] on Tableau Desktop. to create interactive visuals, and Tableau Public to publish our report on the service account in your respective workspace.

The data consists of information about account types and when the account was opened, and the balance. This report has focused on the performance of every account type and job classification.

Data Definition of sheet name "Employee"

Column Name	Descriptions

Age Group	The account holders' age group.

Skill Pre-Requisite:

- 1) Tableau is a stand-alone tool that does not require prerequisites.
- 2) Best of all, Tableau natively. connects to Excel spreadsheets to make data analysis fast and simple. Tableau allows Excel users to keep their spreadsheets while greatly enhancing their ability to analyze their data.
