

Tableau Project Solutions

This information relates to pathology labs located in all US locations. In order to make a strategic and well-informed decision on its expansion, it must closely examine its past performance and business cycle. The management wishes to complete this task, including the analysis, forecasting, and pattern-finding.

Pathology Lab Center Data

Sample data preview

Sr. No.	Patient ID	Date	Patient Name	Gender	Address	Center Name	States	Country	Test Name	Dr. Name	Amount
1	MI-1	13-04-23	Rebecca Didio	Male	171 E 24th St	Kansas	Kansas	United States	EKG	Jim Kriz	300
2	LO-2	11-05-23	Stevie Hallo	Female	22222 Acoma St	Los Angeles	California	United States	PS	Amy Cox	700
3	NE-3	30-05-23	Mariko Stayer	Male	534 Schoenborn St #51	New York	New York	United States	ECG	Roy Phan	600
4	CH-4	07-02-23	Gerardo Woodka	Male	69206 Jackson Ave	Chicago	Illinois	United States	CBC	Ryan Akin	800
5	WA-5	26-05-23	Mayra Bena	Male	808 Glen Cove Ave	New Mexico	New Mexico	United States	CT	Ryan Ng	900
6	LA-6	22-05-23	Idella Scotland	Male	373 Lafayette St	Idaho	Idaho	United States	Urin	Lisa de	650
7	NE-7	23-03-23	Sherill Klar	Male	87 Sylvan Ave	New York	New York	United States	BD	Janet Lee	500
8	LA-8	07-04-23	Ena Desjardiws	Male	60562 Ky Rt 321	Idaho	Idaho	United States	SCT	Eva van	750
9	WA-9	19-01-23	Vince Siena	Male	70 S 18th Pl	New Mexico	New Mexico	United States	MRI	Jim Sink	350
10	SA-10	16-02-23	Theron Jarding	Male	8839 Ventura Blvd	Minnesota	Minnesota	United States	BCT	Rob Dowd	400
11	LA-11	08-01-23	Amira Chudej	Male	3684 N Wacker Dr	Idaho	Idaho	United States	CT	Ryan Ng	900

14	LA-14	08-03-23	Paulina Maker	Male	6 S Hanover Ave	Idaho	Idaho	United States	ECG	Roy Phan	600

Visual Insights

Q.1 Make a table listing the patients by month.

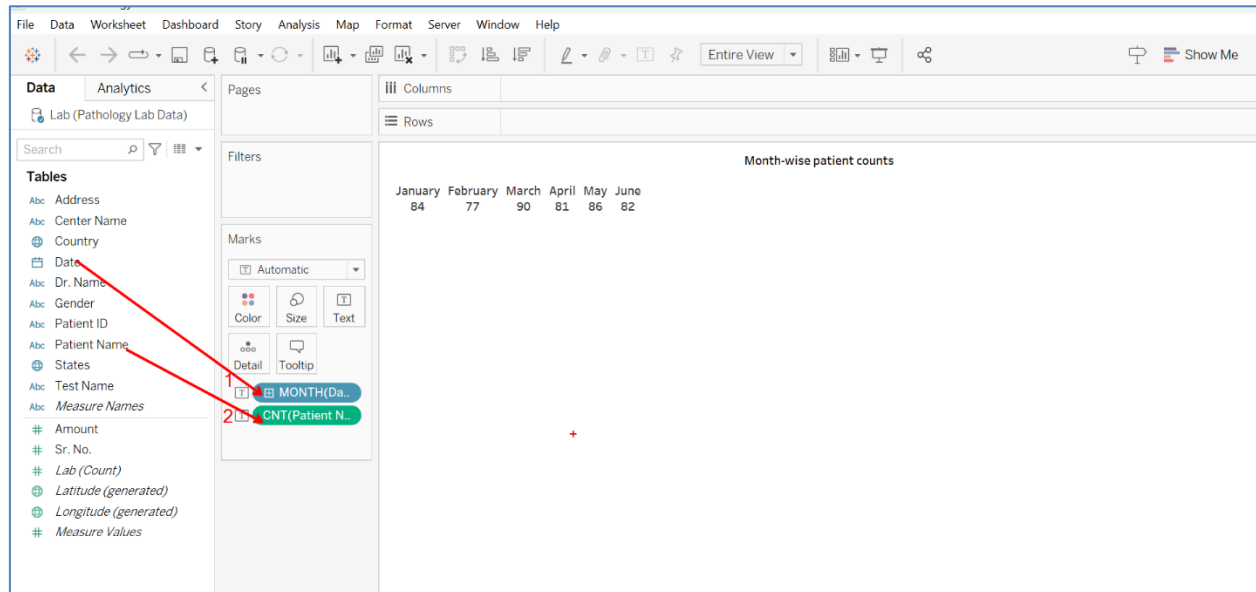

Like:

Month-wise patient counts

January	February	March	April	May	June
84	77	90	81	86	82

Step 1: Drag the Date field into the Text

Step 2: Drag the Patient Name field into the Text

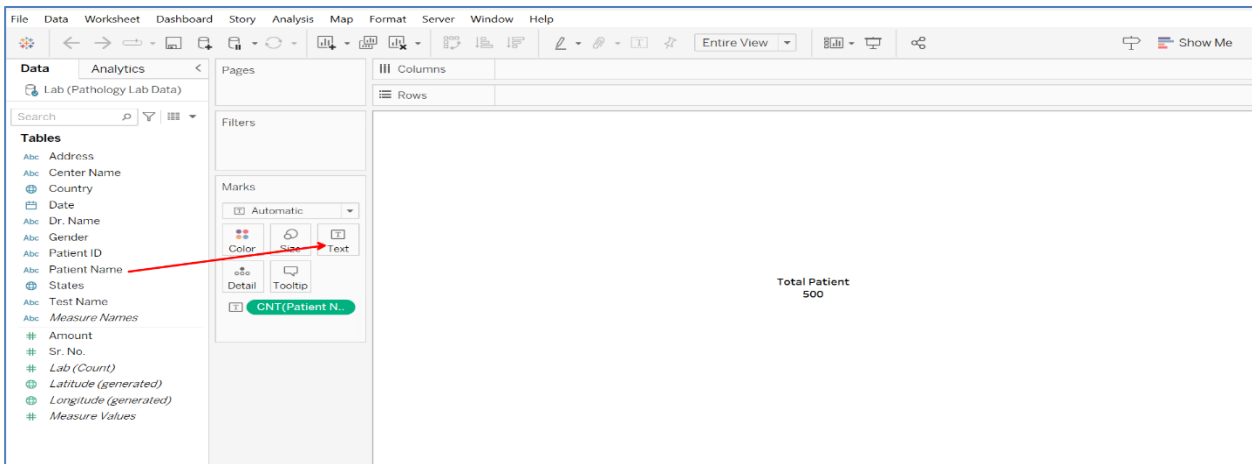

Q.2 Make a cards that include the overall cost as well as the number of patients.

Like:

Total Patient
500

Total Amount
289,900

Drag the field "Patient Name" into the text (Marks cards)

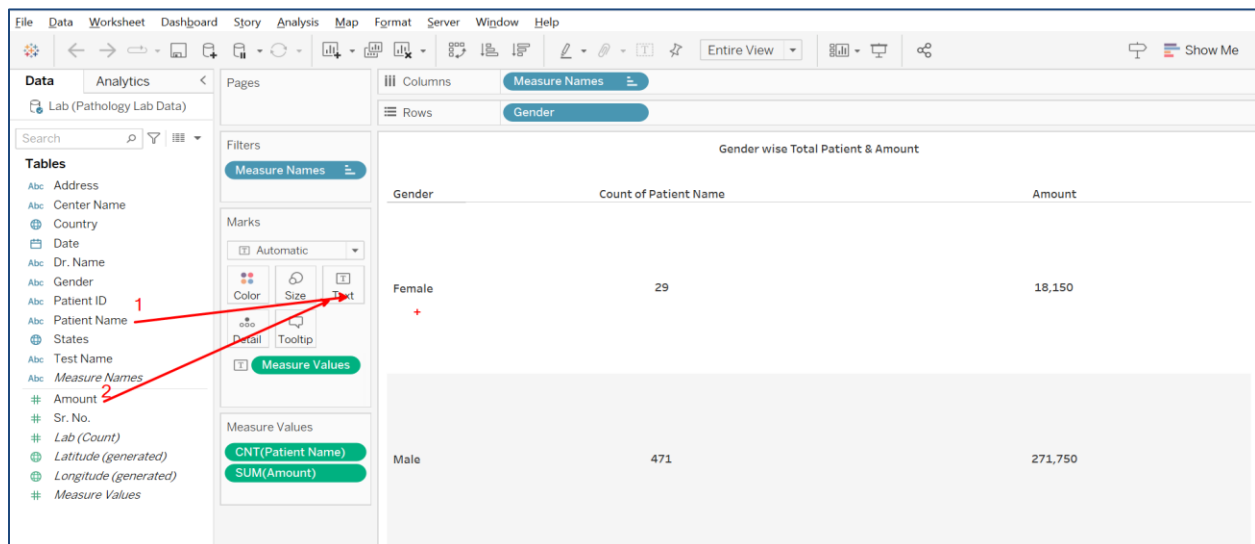

Q.3 Make a table with the total number of patients and total amounts broken down by gender.

Like:

Gender wise Total Patient & Amount		
Gender	Count of Patient Name	Amount
Female	29	18,150
Male	471	271,750

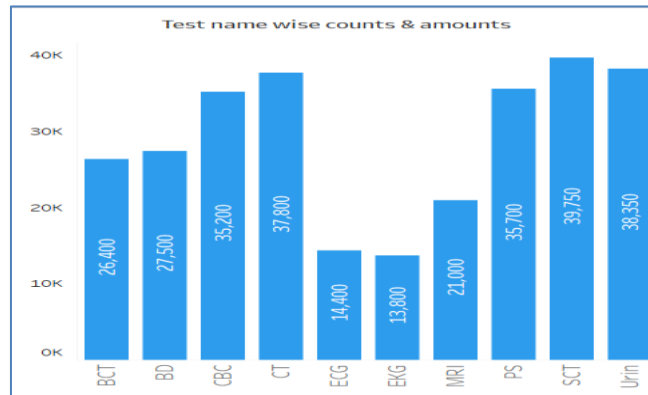

Step 1: Drag the field Patient Name into the Text

Step 2: Drag the field Amount into the Text

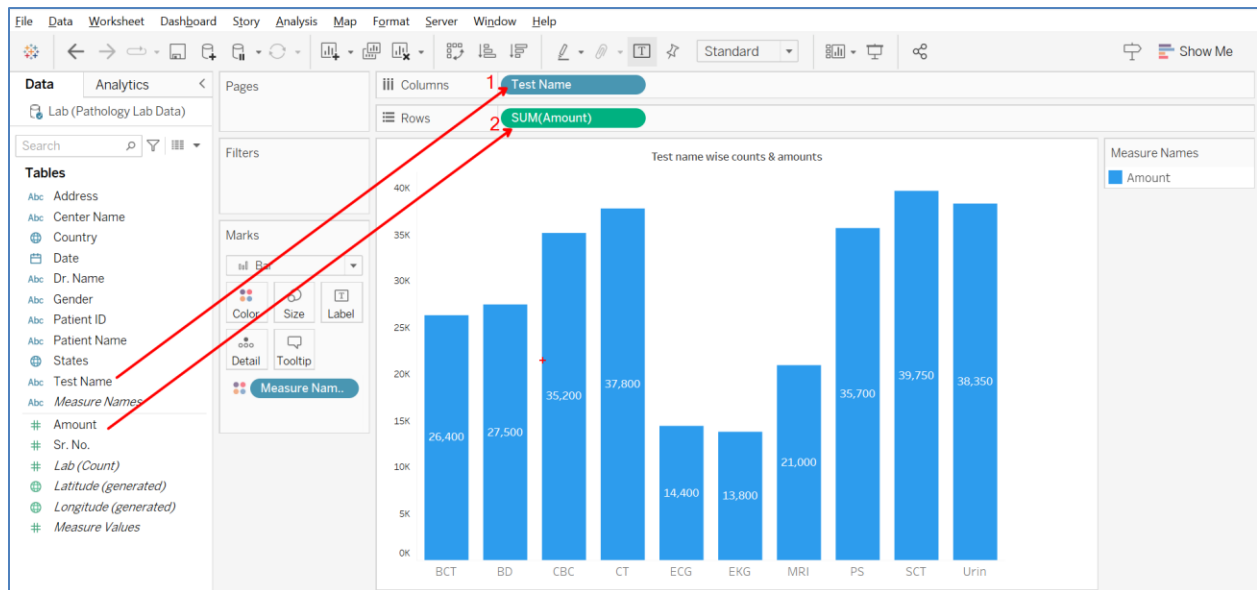

Q.4 For each test name, total patients, and total amount create a column vs line chart.

Like:

Step1: Drag the field Test Name into the column area

Step2: Drag the field Amount into the row area

Q.5 Create a table showing the overall number of patients and total amounts by doctor.

Like:

Dr. Name	Count of Patient Name	Amount
Amy Cox	51	35,700
Eva van	53	39,750
Janet Lee	55	27,500
Jim Kriz	46	13,800
Jim Sink	60	21,000
Lisa de	59	38,350
Rob Dowd	66	26,400
Roy Phan	24	14,400
Ryan Akin	44	35,200
Ryan Ng	42	37,800

Step1: Drag the Dr. Name field into the Rows area

Step2: Drag the Patient name field into the text

Step3: Drag the Amount field into the text

Step4: Entire View

The screenshot shows the Tableau Desktop interface with the following components:

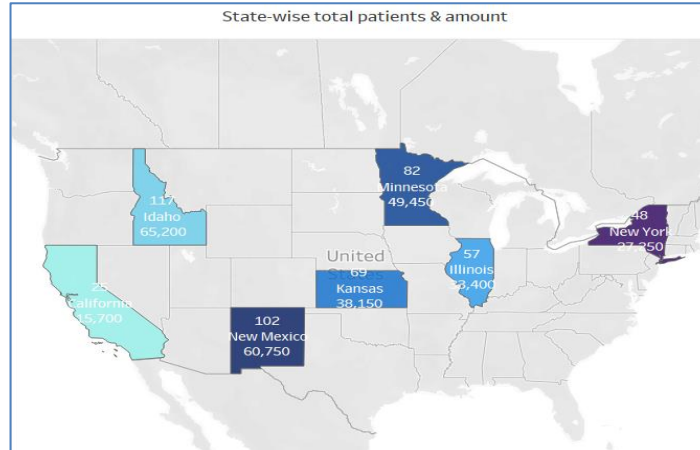

- Columns Shelf:** Measure Names
- Rows Shelf:** Dr. Name (indicated by red arrow 1)
- Marks Shelf:** Text (indicated by red arrow 2)
- Measure Values:** CNT(Patient Name) and SUM(Amount) (indicated by red arrow 3)
- Entire View:** Clicked (indicated by red arrow 4)

The resulting table in the view is:

Dr. Name	Count of Patient Name	Amount
Amy Cox	51	35,700
Eva van	53	39,750
Janet Lee	55	27,500
Jim Kriz	46	13,800
Jim Sink	60	21,000
Lisa de	59	38,350
Rob Dowd	66	26,400
Roy Phan	24	14,400
Ryan Akin	44	35,200
Ryan Ng	42	37,800

Q.6 Create a map chart for state-wise total patients and the total amount

Like:

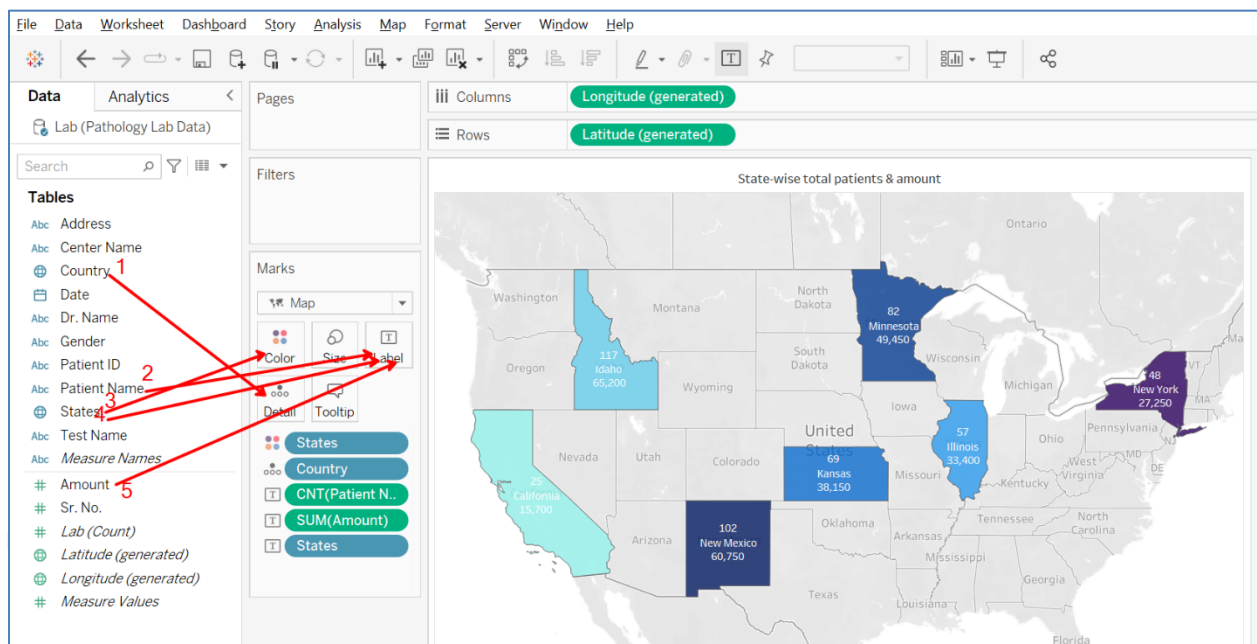

Step1: Drag the Country field into the Details

Step2: Drag the Patient Name field into the Label

Step3: Drag the States field into the Color

Step4: Drag the States field into the Label

Step5: Drag the Amount field into the Label

Final Dashboard
